PROFESSIONAL SUMMARY

Senior Software Engineer with 5+ years of experience building web products across cybersecurity, fintech, and SaaS. Backend-focused with strong PHP and Laravel expertise, I work across the full product lifecycle: architecture, databases, APIs, interfaces, integrations, and deployment. I value clear communication, practical decisions, and software that remains reliable in production.

TECHNICAL SKILLS

Back-end	PHP, Laravel, Symfony, Node.js, REST APIs, WebSockets
Front-end	React, TypeScript, Vue.js, JavaScript, React Native
Data	MySQL, PostgreSQL, Redis, MongoDB
Delivery	Docker, GitHub Actions, CI/CD pipelines, Linux servers
Quality	TDD, PHPUnit, Pest, SOLID principles, secure development practices
Applied AI	Claude, OpenAI API, function calling, RAG, pgvector

FEATURED PRODUCT

Creator & Lead Engineer - OrçaFast

2025 - Present

B2B SaaS - Professional quote management for service businesses

- Designed and built the product end to end: database, backend, frontend, infrastructure, integrations, and deployment.
- Implemented multi-tenant architecture, quote sharing, view tracking, financial goals, team management, Stripe webhooks, and transactional email with Resend.
- Added Claude-powered price suggestions and deployed the application on Hetzner using Docker and CI/CD practices.

EXPERIENCE

Software Engineer - Redbelt Security

2022 - Present

Cybersecurity SaaS - Regulated enterprise environments

- Built and led integrations with ServiceNow, TOPdesk, Jira, QRadar, Google SecOps, and Microsoft 365 to improve enterprise workflows and customer experience.
- Worked across backend, frontend, databases, mobile, dashboards, and GRC modules; contributed through architecture decisions, planning, and code reviews.

Software Engineer - THR Softwares

2021 - 2022

SaaS - Custom software solutions

- Built financial systems, CRM tools, and integrations with Hotmart and Facebook using PHP, Laravel, Vue.js, and MySQL.

Software Engineer - Holding RPX

2019 - 2021

Fintech - White-label banking systems

- Built systems for banking operations, including a ticket workflow that replaced email-based customer requests with a faster, more organized support process.

EDUCATION

Associate Degree - Systems Analysis & Development - FIAP

2020 - 2022

São Paulo, Brazil
